

THE VILLAGE COULD SPEND OVER 4 MILLION DOLLARS BEHIND YOUR BACK

DO YOU CARE?

Monday,
February 2nd
8pm
Village Hall

WE DO!

LET US SHOW YOU THE OPTIONS THEY REFUSE TO.

FARMINGDALE WATER WORKS is an initiative led by former Mayor, "Butch" Starkie, and fellow residents to ensure we receive **affordable** drinking water today and **in the future**. We request a **public conversation** outlining all current expenditures being approved by the board. The public deserves an explanation of the alternative option currently available from the Suffolk County Water Authority to provide both an updated quality water system and lower individual rates*. This possible agreement with the SCWA could save village residents over 4 million dollars.

Isn't this worth a public conversation?

- We need millions of dollars to upgrade our aging water system now.
- The current Mayor and Board are voting to spend HUNDREDS of THOUSANDS of DOLLARS for upgrades that would cost us ZERO if we teamed up with SCWA.
- As of now, the Board has shut down the public conversation on what the full plan is for our water department.

*Go to our website today to read what the experts say and to see the projected savings on YOUR water bill.
